# WithU

One platform for many affected souls.

The story

Whaaaat ...?

People flee to safety. Others stay and need humanitarian aid. The web is almost as fast as the crisis appeared. Groups, initiatives, organisations and donation opportunities provide access to information and actions to help and deal with the crisis.

WithU brings them all together.
One platform for many affected souls.
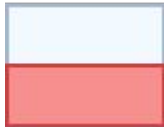

The story

| #stay | #transport | #legal | #medical | #animal | #finance |

| polish | slovakian | romanian | german |

The story

As a **user** I can **search for helpful web resources** to **overcome difficulties** which ukrainians face **with the current crisis**. I can find **a trustful, (moderated) platform** which gives me thematic **guidance for legal** related **topic**, **stay opportunities** or **medical help** etc.

By **logging** into my account **I could** even **contribute to the community** by adding and editing own web resources.
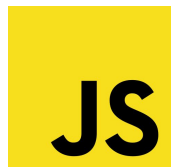

Technology used

Frontend

Backend

Breakdown of tasks, roles, successes

1 Preparation: Finalizing idea, wireframe, file structure, npm i, collecting web sources, splitting in two groups (Frontend / Backend)

**2 Frontend**: Choosing CSS Framework, first drafts, components

3 Backend: Setting up DB, creating schema, seeds, typeDefs, auth …

4 Functionality: React routes, validations, login, sign up, logout, web snapshots , search by tags, editing resources, creating cards, …, testing

5 Successes: Collaborating in a big group, weg snapshots of the web pages …

Demo

Direction for further development

- Ranking resources
- Multilingual
- Review via comments
- Moderated maintenance - admin role
- Direct donation options
- Crowdfunding options
- Chatbot for instant guidance

💝 **Thank you!**
